

ELECTRICITY PRICE INCREASE | CARBON FEE LEVIED WORRIED ABOUT ENERGY SAVING ?

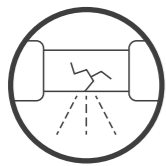

Choose "MINDMAN High-Efficiency Energy Solutions"

Let's turn **WASTE** into **PROFIT** !

KEY POINTS you must know for **ENERGY EFFICIENCY**

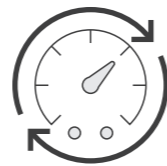

Pipeline Leaks

The biggest waste — monitor in real time and make immediate improvements.

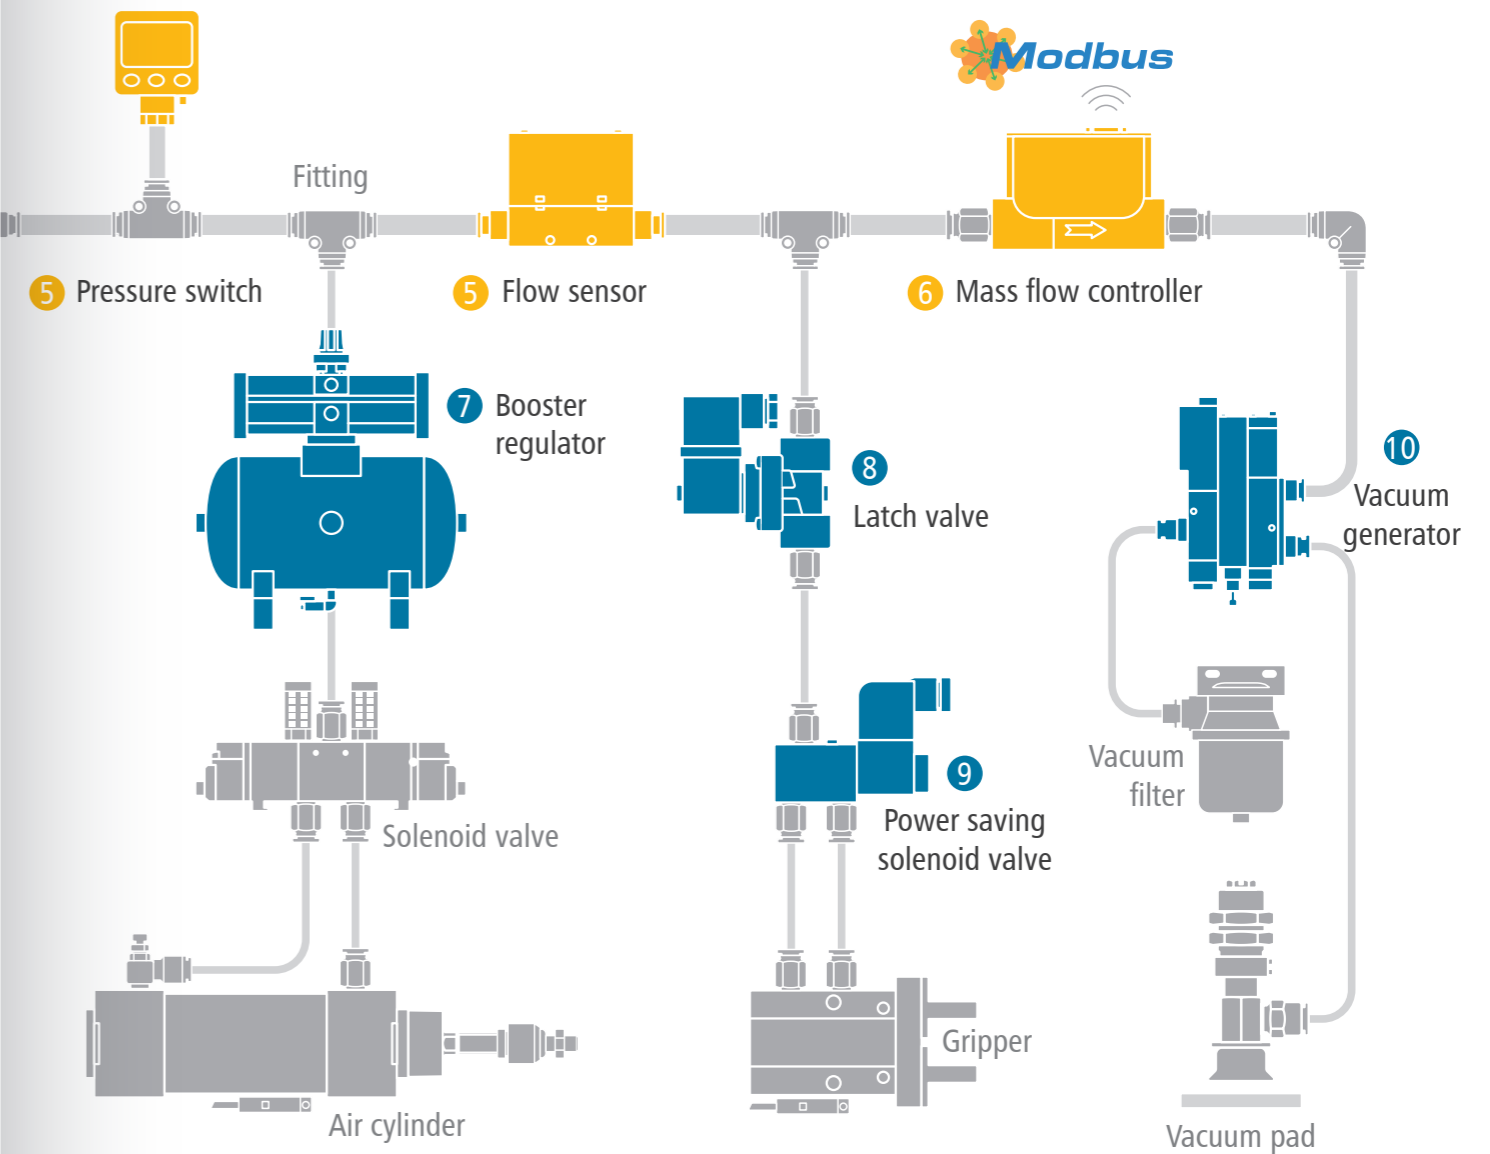

Pipeline Management

Optimize pipeline configuration and management; turn off unused circuits.

Energy Saving

Reducing operating pressure by 1 kg can save approximately 6-10% in energy consumption.

1

Air Compressor

SAS-V
series

Made in Japan
Frequency conversion
energy saving

[Taiwan General Agent]
AIRMAN

2

**Refrigeration
dryer**

MAPU
series

Fully automated load
adjustment control

3

ON-OFF Valve

MVHR
series

Electromagnetic drive
with remote cut-off
control

4

**Electro Pneumatic
Regulator**

MAER
series

Real-time pressure
adjustment based
on load
RS232
RS485

5

**Pressure Switch
Flow Sensor**

MF, MP
series

Pipeline condition
monitoring for
preventive
maintenance

6

**Mass Flow
Controller**

**MFCA
MFCB**
series

Precise flow
control on demand
RS485

7

**Booster
Regulator**

MVBA
series

Cost-effective upgrades
for localized
high-pressure
applications

8

Latch Valve

**MUSL
MUCL**
series

Energy-efficient
electromagnetic hold
after activation

9

**Power Saving
Solenoid Valve**

**MVDC
MVSU**
series

With an embedded
energy-saving circuit
in the connector

10

**Vacuum
Generator**

VN
series

Self-holding vacuum
pressure with
energy-saving circuit

[Taiwan General Agent]
PISCO
