

BOOSTER REGULATOR WITH AIR TANK

MVBAT

General flow
Max. 1000 L/min

Big flow
Max. 1600 L/min

MVBA-2100 series

MVBA-4100 / 4300 series

Features

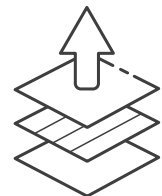

2x Pressure Boost

Increases air pressure up to x 2 through piston compression.

Cost Reduction

No power supply needed — pressurizes only the necessary areas, achieving energy and cost savings across the entire air compression pipeline.

Material Upgrade

Switch valve features ultra-durable metal for enhanced wear resistance.

Energy-Saving & Eco-Friendly

Reduces both power and air pressure consumption, enhancing energy efficiency.

Space Saving

Compact, low-heat, and easy to install.

Extended Lifespan

Ultra-durable metal construction significantly prolongs operational life.
